Dr. Beckmann

Useful tips:

- Treat the stains as fast as possible, while they are still fresh.
- Treat the stains before washing the garments in the washing machine. Washing/ironing can cause stains settling into the fabric, which makes the stain removal difficult.
- Allow Stain Expert to sit for a moment, but do not let it dry.
- Pre-test Stain Expert on an inconspicuous part of the fabric to check its colour fastness and consistency.
- Always read the direction to use on the back of the Stain Expert before using. Always check garment care label.

Stain
SOS
Guide

Dr. Beckmann ORIGINAL®

A stain is not just a stain.

Be it juice, grass, coffee or chocolate – every stain is different. Depending on their composition, stains can be very stubborn and very specific. Thus, the determinant of a successful stain removal is the right choice of stain remover.

The solution: Dr. Beckmann offers a wide selection of diverse & high-performance stain removers for every particular stain problem. Try it now!

How it works?
